The Assessment & Facilities Analysis of our Criminal Justice System conducted by the Institute for Law & Policy Planning (ILPP) has proven to be one of the wisest investments our Board of County Commissioners (BOCC) has ever made.

Their report --- dubbed The Kalmanoff Report --- was presented April 1994 after an extensive 8 month investigation conducted with the full cooperation of our elected officials including our constitutional officers (see enclosed acknowledgments).

Obviously the findings contained in this report mirror our records, policies and procedures.

Dr. Alan Kalmanoff presented this report at a Public Hearing conducted by the BOCC and received extremely complimentary remarks from all in attendance (certain special interests who were in attendance but silent have since made an effort to discredit this report but they will not be successful).

The cost of this report was approximately \$300,000. We have implemented one of their recommendations resulting in annual savings of more than \$3 million to our taxpayers. Millions more in savings are available and will be enjoyed provided we act on certain other recommendations.

Yours very truly,

FECP CORPORATION
