P.O. Box 5137  
Berkeley, CA 94705

Dear Alan:

I wanted to thank you Alan for the great job done on the Space Allocation program for the Old Hall of Justice at Solano. This project concerned the reallocation of approximately 80,000 square feet of space between 10 different county departments. The objective was to determine the space needs of those remaining in the building after a major department moved out. Further, the concept included a consolidation of functions so that Departments would not have to be spread in many different locations throughout the building. In addition, there were severe restraints on the costs related to any remodeling projected in the reallocation program.

Pat Bradley and David Moulton worked together on this job and provided to this County an outstanding plan. They examined all the needs, provided various scenarios and made a thorough and defensible recommendation on the use of space. They worked with a vast variety of individuals on the job and it is a tribute to them that they were able to come up with a plan that was acceptable to all of the occupants.

I was most also pleased with the presentation of their recommendations to the occupants of the building. They backed all the issues up with facts and figures in a presentable and understandable format. The resulting space plan for the building is a ready reference to me in addition to be a well written document.

I appreciate the time and energy of your crew who were involved in this study. Again, my thanks.

Regards.

Sincerely,

  
Susan L. Rogers  
General Services Director
